Summary

Senior Full-Stack Engineer with 6+ years of experience building high-performance web applications with React and TypeScript, backed by hands-on .NET / C# and Node.js backend development. Technical leader who reviews ~80% of the company's client-side pull requests, led the refactoring of ~70% of a production frontend, and owns greenfield products end to end. Practitioner of the Agentic Development Lifecycle (ADLC): built custom Claude skills and rules for loop engineering, analytics, performance review, and compliance-based security guards, and set company-wide client-side AI development standards. Experienced in running parallel projects and mentoring junior engineers.

Skills

Frontend: React 18, React 19, TypeScript, JavaScript, Next.js, Vite, Zustand, TanStack Query (React Query), Redux Toolkit, MobX, RxJS, React Hook Form, Zod, React Router, Angular, Tailwind CSS, SCSS, HTML, CSS, MUI

Backend & APIs: .NET, C#, ASP.NET Core, Node.js, REST APIs, GraphQL, WebSocket, OpenAPI / Swagger, Python, Java, RabbitMQ, Kafka

Cloud & Databases: AWS (S3), Azure, Docker, CI/CD, PostgreSQL, MySQL, MongoDB, Redis

Testing: Playwright, Storybook, Vitest, Unit Testing, Integration Testing, E2E Testing

AI Engineering: ADLC, Claude, MCP, Custom AI Skills and Rules, System Prompts, AI Agents, Agentic Workflows, Loop Engineering, AI Code Governance

Architecture & Practices: Clean Architecture, SOLID, Design Patterns, Component-Driven Development, Performance Optimization, Code Review, Technical Debt Reduction, Git, GitHub, Jira, Confluence

Experience

Senior Full-Stack Engineer / Client-Side Owner

Jan 2025 – Present

Wotch / Transperra, Tel Aviv

- Own client-side architecture and delivery for Transperra, a multi-client healthcare platform where one codebase serves several clients through client-specific configuration, workflows, and data ingestion.
- Deliver end-to-end features that connect React 19 / TypeScript interfaces to .NET 10 / ASP.NET Core REST APIs with OpenAPI-generated TypeScript clients.
- Implemented Twilio-based OTP authentication and user communication flows across backend and frontend.
- Built a backend Announcements module: REST APIs, business logic, data persistence, and AWS S3 media storage.
- Created custom Claude skills and rules for engineering workflows, analytics, performance reviews, and compliance-based security guardrails; defined company-wide client-side AI development standards, including MCP configurations, skills, and agent settings, and governed and validated AI-generated code.

Senior Frontend Engineer

Dec 2022 – Jan 2025

Wotch / Maccabi, Tel Aviv

- Led the refactoring of ~70% of the production frontend, improving code quality, maintainability, and performance.
- Replaced Recoil with Zustand + TanStack Query, separating client state from server data.
- Introduced WebSocket real-time communication and a system-wide logging mechanism.
- Set up unit and E2E testing with Vitest and Playwright; built reusable UI KIT components with Storybook and Tailwind CSS.
- Mentored junior developers, made architectural decisions, conducted code reviews, and led technical design planning.

Frontend Engineer

Sep 2021 – Dec 2022

GoTech (clients: Varonis, Exposebox), Herzliya / Petah Tikva

Varonis: Built 5 data dashboards that visualize usage, cost, risk, and performance of AWS, Azure, Salesforce, and Slack services, using React, TypeScript, Zustand, GraphQL, SCSS, and MUI, Python.

Exposebox: Developed dashboards, pop-ups, notifications, and interactive flows for a marketing automation SaaS platform with React, TypeScript, MobX, REST APIs, PostgreSQL, Java
• Designed reusable dashboard systems with custom MUI theming for a consistent product experience.

Software Engineer

Jun 2020 – Sep 2021

Elpisor Ltd (projects: Lomda, Pillstate), Rehovot

Lomda: Built an international e-learning platform with interactive lessons, automatic assessments, video conferencing, and course creation, using React, Redux, and Node.js.

Pillstate: Developed web workflows for a medical supply distribution platform with Angular, TypeScript, RxJS, Node.js, and MongoDB

Education

Tel-Ran: Full-Stack Software Engineering Program (Frontend and Backend)

Moscow State University of Civil Engineering: Industrial and Civil Engineering

Languages

Hebrew, English, Russian
