PROFESSIONAL SUMMARY:

Results-driven **Senior Full-Stack Developer** with 6+ years of experience specializing in high-performance client-side architecture using **React**, **TypeScript**, complemented by enterprise **.NET** and **C#** backend expertise. Recognized technical leader who reviews ~ **80%** of company client pull requests, spearheads complex legacy refactoring, and acts as owner for greenfield products and global complex features. Proven track record of managing parallel multi-project tracks, heading junior engineers, and establishing company-wide client-side AI architecture standards.

CORE TECHNOLOGIES/ SKILLS:

Frontend Engineering

React · TypeScript · Next.js · React Hooks · React Router · Zustand · TanStack Query · Zod · Redux Toolkit · RTK Query · MobX · RxJS · React Hook Form · Tailwind CSS · HTML · CSS · SCSS

Backend & APIs

.NET · C# · Node.js · REST APIs · GraphQL · Python · Java · SQL · API Integration · OpenAPI / Swagger · Postman

Cloud & Infrastructure

Azure · AWS · Docker · CI/CD

Databases

MySQL · PostgreSQL · MongoDB · Redis

Testing & Quality

Playwright · React Testing Library (Vitest) · Unit Testing · Integration Testing · E2E Testing

Architecture & Engineering

Clean Architecture · SOLID · Design Patterns · Modular Architecture · Component-Driven Development · API Architecture · Performance Optimization · Code Review · Technical Debt Reduction

AI & Modern Development

ADLS System · Claude · AI-assisted Development · AI Agents · Custom AI Skills · Agentic Workflows

Development & Collaboration

Git · GitHub · Atlassian Suite

PROFESSIONAL EXPERIENCE:

Senior Full-Stack Engineer / client-side owner

2025 January - Present: «Watch/ Transperra», Tel-Aviv

-
- Acted as the **client-side owner for the Transperra product**, driving frontend technical direction, implementation, and delivery across the full product lifecycle.
 - Worked across **both frontend and backend**, implementing end-to-end product functionality rather than focusing exclusively on the UI layer.
 - Implemented Twilio-based communication functionality across the backend and frontend, including OTP-related flows and user communication for **authentication flows system**.
 - Developed a new **backend Announcements module** for creating, managing, and delivering client-specific announcements, including backend APIs, business logic, and data

persistence with **AWS S3 image storage** for announcement-related media.

- Built and integrated **full-stack features**, connecting React/TypeScript interfaces with .NET backend APIs and shared services.
- Worked with React, TypeScript, Vite, TanStack Query, Zustand, Tailwind CSS, .NET 10, ASP.NET Core, REST APIs, OpenAPI, and generated TypeScript API clients.
- Contributed to a **multi-client platform** where the same codebase supports different healthcare clients through client-specific configuration, workflows, data ingestion, and frontend experiences.

Senior Frontend Engineer

2022 December - 2025 January: «Wotch/ Maccabi», Tel-Aviv

-
- Led the refactoring of approximately **70% of the production frontend**, significantly improving code quality, maintainability, and application performance.
 - Replaced **Recoil with Zustand + React Query**, establishing a clearer separation between client-side state and server-side data.
 - Implemented a **system-wide logging mechanism** providing consistent and reliable application logging.
 - Introduced **WebSocket-based real-time communication**, enabling instant data delivery and reactive UI updates.
 - Developed and maintained complex features using React 18, TypeScript, React Hooks, and modern frontend architecture patterns.
 - Implemented **Unit and E2E testing** using Vitest and Playwright.
 - Built and maintained reusable UI components with **Storybook** and Tailwind CSS.
 - Participated in architectural decisions, code reviews, technical planning, and modernization of the existing application.
 - Mentored junior developers during onboarding and their first development phases.

Frontend Engineer

2022 June - 2022 December «GoTech/ Varonis», Herzliya

-
- Developed **5 specialized data dashboards** for visualizing the benefits, risks, usage, cost, and performance of enterprise services including AWS, Azure, Salesforce, and Slack.
 - Built complex **data visualization interfaces** combining interactive charts, widgets, and configurable dashboard components to support analysis of large volumes of service-related data.
 - Focused on creating **clear, user-friendly, and reusable UI components** that enabled clients to monitor service usage and identify optimization opportunities.
 - Developed reusable frontend architecture and components using **React, TypeScript, Zustand, Storybook, SCSS, and MUI**.
 - Integrated frontend applications with **GraphQL APIs and MySQL-backed services**.

Frontend Engineer

2021 September - 2022 June: «GoTech/ Exposebox», Petah-Tikva

-
- Participated in the development of a **SaaS platform for personalized marketing automation**, focused on delivering highly targeted customer experiences.
 - Developed **dashboard panels, pop-ups, notifications, and interactive UI flows** supporting customer journey personalization and marketing automation.
 - Implemented reusable frontend components and application state management using **React, TypeScript, MobX, and Context API**.

- Integrated frontend functionality with **REST APIs** and contributed to building a scalable and customizable UI system.
- Worked with **MUI and custom theming** to maintain a consistent product experience across the platform.

Software Engineer

2020 October - 2021 September: «Elpisor, Ltd / Lomda», Rehovot

- Developed an **international e-learning platform** for remote education, supporting interactive lessons, debates, and video conferencing for students and teachers.
- Implemented functionality for multiple lesson types, automatic assessments, online learning workflows, and custom course creation.
- Built interactive interfaces designed to support personalized learning experiences and active student participation.
- Worked across the **frontend and backend**, implementing features with React and Node.js and integrating application state with Redux.
- Collaborated with a cross-functional team on the development and evolution of the platform.

Software Angular Engineer

2020 June - 2020 October: «Elpisor, Ltd / Pillstate», Rehovot

- Collaborated with a **cross-functional team** to develop web and Android solutions for streamlining the distribution of medical supplies to people with disabilities.
- Developed frontend functionality and user workflows for the web platform using **Angular and TypeScript**.
- Implemented reactive application flows and data handling using **RxJS** and integrated frontend functionality with Node.js backend services.
- Contributed to both **web and mobile development**, working with Java and Android alongside the web stack.
- Worked with MongoDB and reusable UI technologies to support the development of the platform.

LANGUAGES:

Hebrew, English, Russian

EDUCATIONS:

"Tel-Ran Computer":

FE/BE Software Engineering full course.

"Moscow State University of Civil Engineering":

Industry and Civil Engineering. Russia

ACHIEVEMENTS:

Won 3rd place in the Moscow youth art competition.

I participated and received a diploma in an art competition in Spain.

Won a design-tender to design a Website for a modern theater studio.

Recommendations will be given on request
