SUMMARY

I'm Senior Fullstack Engineer (Frontend Oriented) with 7 years of experience building high-performance web applications with React and TypeScript, backed by full-stack delivery on .NET / C# and Node.js. Client-side owner of a multi-client healthcare platform. Developed Claude rules, skills, and plugins aligned with company standards, which brought ~80% of the codebase to company quality standards, accelerated new feature delivery, improved process transparency and test coverage, and made AI adoption stable and secure. Reviews ~80% of the company's client-side pull requests and led the refactoring of ~70% of a production frontend. Mentors junior developers and runs parallel projects.

SKILLS

Frontend: React 19, TypeScript, JavaScript, Next.js, Vite, Zustand, TanStack Query, ReduxToolkit, MobX, RxJS, React Hook Form, Zod, React Router, Ky, Orval, Angular, Tailwind CSS, SCSS, MUI, HTML, CSS

Backend and APIs: .NET, C#, ASP.NET Core, Node.js, REST APIs, GraphQL, Modular Monolith, Temporal, Kafka, WebSocket, Server-Sent Events (SSE), OpenAPI / Swagger, Python, Java Spring

Testing: Playwright, Storybook, Vitest, Unit Testing, Integration Testing, E2E Testing

AI Engineering: Claude, MCP, Custom Claude Skills, Rules, and Plugins, AI Agents, Agentic Workflows, System Prompts, AI Code Governance

Cloud and Databases: AWS S3, Docker, CI/CD process, PostgreSQL, MongoDB, Redis

Architecture and Practices: Performance Optimization, Clean Architecture, SOLID, Design Patterns, Code Review, Technical Debt Reduction, Git, GitHub, Jira, Confluence

UI/UX and Product: Figma, Design Systems, UI Kit, Component-Driven Development, Accessibility, Product Thinking

EXPERIENCE

Wotch Health, Tel Aviv

Senior Full-Stack Engineer, Client-Side Owner

Jan 2025 – Present

Client project: Transperra Health, multi-client healthcare platform

- Own client-side architecture and delivery for a healthcare platform where one codebase serves several clients through client-specific configuration, workflows, and data ingestion.
- Developed Claude rules, skills, and plugins aligned with company standards for code quality, testing, performance review, analytics, and compliance-based security; brought ~80% of the codebase to company standards, accelerated new feature delivery, and improved process transparency and test coverage.
- Defined company-wide client-side AI development standards, including MCP configurations, skills, plugins, and agent settings, making AI adoption stable and secure; review and validate AI-generated code.
- Review ~80% of the company's client-side pull requests.
- Deliver end-to-end features that connect React 19 / TypeScript interfaces to .NET 10 / ASP.NET Core REST APIs with OpenAPI-generated TypeScript clients.
- Develop features in a .NET modular monolith with Temporal workflows for long-running processes, Kafka event streaming, and Redis caching.
- Built real-time UI updates with Server-Sent Events (SSE) and polling.
- Implemented Twilio-based OTP authentication and user communication flows across frontend and backend.
- Built a backend Announcements module: REST APIs, business logic, data persistence, and AWS S3 media storage.

Senior Frontend Engineer

Dec 2022 – Jan 2025

Client project: Maccabi Health

- Led the refactoring of ~70% of the production frontend, improving code quality, maintainability, and performance.
- Replaced Recoil with Zustand and TanStack Query, separating client state from server data.
- Introduced WebSocket real-time communication and a system-wide logging mechanism.
- Set up unit and E2E testing with Vitest and Playwright; built a reusable UI Kit with Storybook and Tailwind CSS.
- Mentored junior developers, made architectural decisions, conducted code reviews.
- led technical design planning.

GoTech, Netanya
Frontend Engineer

Sep 2021 – Dec 2022

Client project: Varonis, Herzliya

- Built reusable, custom data dashboards that visualize usage, cost, risk, and performance of AWS, Azure, Salesforce, and Slack services, using React, TypeScript, Zustand, GraphQL, SCSS, MUI, D3 for graph system and Python.

Client project: Exposebox, Petah Tikva

- Developed dashboards, pop-ups, notifications, and interactive flows for a marketing automation SaaS platform with React, TypeScript, MobX, REST APIs, PostgreSQL, and Java.
- Designed reusable dashboard systems with custom MUI theming for a consistent product experience.

Elpisor, Ltd, Rehovot
Software Engineer

Jun 2020 – Sep 2021

Client project: Lomda, Rehovot

- Built an international e-learning platform with interactive lessons, automatic assessments, video conferencing, and course creation, using React, Redux, MUI, MySQL and Node.js.

Client project: Pillstate Health, Rehovot

- Developed web workflows for a medical supply distribution platform with Angular, TypeScript, RxJS, Node.js, and MongoDB.

UI/UX Designer and Product Manager

2016 – 2020

- Designed user interfaces and user flows, managed product requirements, priorities, and delivery with development teams.

EDUCATION

Full-Stack Software Engineering Program (Frontend and Backend) *Tel-Ran*

2019 – 2020

Industrial and Civil Engineering *Moscow State University of Civil Engineering*

2012 – 2015

LANGUAGES

Hebrew, English, Russian
